

About Disparities in Care

Health disparities refer to the differences in health and health care received among groups of people. These differences reveal how frequently a disease affects a group, whether a group receives appropriate care for their disease, or how often the disease causes disability or death. Some groups are more likely to be affected by disparities, including ethnic and racial minorities, women, children or the elderly, or persons with disabilities. Disparities are typically related to underuse of effective, evidence-based care.

Through the population health lens, disparities in care can be seen as the failure—or success—of effective population management. Organizations that work to improve disparities also focus on their biggest breakdowns in the care process and thereby work to improve the care for all of their patients and community members. Improving disparities in care, therefore, is a key to addressing successful population management.

To produce these reports, the Alliance has stratified the 2013 Community Checkup Medicaid data by race, ethnicity, and language, the only population for whom this analysis can be done with claims data. Our reports focus on *process* and the delivery of care for Medicaid enrollees. This is a different perspective than many disparities reports, which often look at health *outcomes*. Many national and state reports have shown how many populations are disproportionately impacted by disease and health status. However, the Alliance reports provide insight into how many of these same populations are not receiving the care they need, thus showing a relationship between higher disease rates and underuse of effective care.

About the county-level data

The Medicaid population in this report represents those clients who had full Medicaid insurance benefits in the measurement year of July 1, 2011 to June 30, 2012, and who qualified for Medicaid due to their low income, rather than those eligible due to a disability or high medical need. Medicaid clients who were not eligible for full coverage (such as family planning-only services), those who qualified based on medical need (blind, disabled, medically needy), and/or those who had other payer sources (such as Medicare) were not included in the study. Of the almost 1.2 million Medicaid enrollees in the Alliance's data base, 709,042 met the measure criteria.

Medicaid data limitations include possible underreporting of claims by managed care plans and no reporting of services received outside of Medicaid, such as those from free clinics in the community or tribal clinics. The data has been stratified by race, ethnicity, and language (REL). Findings were not adjusted for differences in age and gender distribution, except for those measures reported by age group and gender. A Wilson Score Interval test, using a 95 percent confidence interval, was used to show the statistically significant difference between variables. Denominators lower than 160 are suppressed and indicated in the report with an asterisk.

More information and key findings can be found in the **2014 Disparities in Care report**:

About Washington Health Alliance

The Washington Health Alliance brings together those who give, get and pay for health care to create a high-quality, affordable system for the people of Washington state.

The Alliance is a nonprofit, nonpartisan organization that shares the most reliable data on health care quality and value in the state to help providers, patients, employers and union trusts make better decisions about health care. As a purchaser-led, multi-stakeholder collaborative with more than 175 participants, the Alliance serves an invaluable role as a convener of all the stakeholders in the health care system and in leading health system improvement.

The Alliance offers focused, data-driven reports on health care throughout the state of Washington. The reports help the community we serve determine how well we're doing as a state to reach our goals for quality and value in health care. A cornerstone of the Alliance's work is the *Community Checkup*, a report to the public comparing the performance of clinics and hospitals for basic measures of quality care (www.wacommunitycheckup.org).

2014 Disparities in Care Report Summary By County

Using a 95% confidence interval, comparison to the region is denoted as follows:
Grey = rate is similar to region; **Red** = rate is significantly lower than region; **Green** = rate is significantly higher than region
 ** Results that have a denominator less than 160 have been excluded

*Includes all records for which an ethnicity, language, or race was populated in the Medicaid data set.
 **Medicaid data includes all of the race, ethnicity, and language (REL) Medicaid FFS data and a majority of the REL data for the Managed Medicaid population.
 The results are based on claims data with dates of service between January 1, 2004 and June 30, 2012 and the measurement year of July 1, 2011 - June 30, 2012.

2014 Disparities in Care Report Summary By County

Using a 95% confidence interval, comparison to the region is denoted as follows:
Grey = rate is similar to region; **Red** = rate is significantly lower than region; **Green** = rate is significantly higher than region
 ** Results that have a denominator less than 160 have been excluded

*Includes all records for which an ethnicity, language, or race was populated in the Medicaid data set.
**Medicaid data includes all of the race, ethnicity, and language (REL) Medicaid FFS data and a majority of the REL data for the Managed Medicaid population.
The results are based on claims data with dates of service between January 1, 2004 and June 30, 2012 and the measurement year of July 1, 2011 - June 30, 2012.

2014 Disparities in Care Report Summary By County

Using a 95% confidence interval, comparison to the region is denoted as follows:
Grey = rate is similar to region; **Red** = rate is significantly lower than region; **Green** = rate is significantly higher than region
 ** Results that have a denominator less than 160 have been excluded

*Includes all records for which an ethnicity, language, or race was populated in the Medicaid data set.
**Medicaid data includes all of the race, ethnicity, and language (REL) Medicaid FFS data and a majority of the REL data for the Managed Medicaid population.
The results are based on claims data with dates of service between January 1, 2004 and June 30, 2012 and the measurement year of July 1, 2011 - June 30, 2012.

2014 Disparities in Care Report Summary By County

Using a 95% confidence interval, comparison to the region is denoted as follows:
Grey = rate is similar to region; **Red** = rate is significantly lower than region; **Green** = rate is significantly higher than region
** Results that have a denominator less than 160 have been excluded

*Includes all records for which an ethnicity, language, or race was populated in the Medicaid data set.
**Medicaid data includes all of the race, ethnicity, and language (REL) Medicaid FFS data and a majority of the REL data for the Managed Medicaid population.
The results are based on claims data with dates of service between January 1, 2004 and June 30, 2012 and the measurement year of July 1, 2011 - June 30, 2012.

2014 Disparities in Care Report Summary By County

Using a 95% confidence interval, comparison to the region is denoted as follows:
Grey = rate is similar to region; **Red** = rate is significantly lower than region; **Green** = rate is significantly higher than region
 ** Results that have a denominator less than 160 have been excluded

*Includes all records for which an ethnicity, language, or race was populated in the Medicaid data set.
**Medicaid data includes all of the race, ethnicity, and language (REL) Medicaid FFS data and a majority of the REL data for the Managed Medicaid population.
The results are based on claims data with dates of service between January 1, 2004 and June 30, 2012 and the measurement year of July 1, 2011 - June 30, 2012.

2014 Disparities in Care Report Summary By County

Using a 95% confidence interval, comparison to the region is denoted as follows:
Grey = rate is similar to region; **Red** = rate is significantly lower than region; **Green** = rate is significantly higher than region
** Results that have a denominator less than 160 have been excluded

*Includes all records for which an ethnicity, language, or race was populated in the Medicaid data set.
**Medicaid data includes all of the race, ethnicity, and language (REL) Medicaid FFS data and a majority of the REL data for the Managed Medicaid population.
The results are based on claims data with dates of service between January 1, 2004 and June 30, 2012 and the measurement year of July 1, 2011 - June 30, 2012.

2014 Disparities in Care Report Summary By County

Using a 95% confidence interval, comparison to the region is denoted as follows:
Grey = rate is similar to region; **Red** = rate is significantly lower than region; **Green** = rate is significantly higher than region
** Results that have a denominator less than 160 have been excluded

*Includes all records for which an ethnicity, language, or race was populated in the Medicaid data set.
**Medicaid data includes all of the race, ethnicity, and language (REL) Medicaid FFS data and a majority of the REL data for the Managed Medicaid population.
The results are based on claims data with dates of service between January 1, 2004 and June 30, 2012 and the measurement year of July 1, 2011 - June 30, 2012.

2014 Disparities in Care Report Summary By County

Using a 95% confidence interval, comparison to the region is denoted as follows:
Grey = rate is similar to region; **Red** = rate is significantly lower than region; **Green** = rate is significantly higher than region
** Results that have a denominator less than 160 have been excluded

*Includes all records for which an ethnicity, language, or race was populated in the Medicaid data set.
**Medicaid data includes all of the race, ethnicity, and language (REL) Medicaid FFS data and a majority of the REL data for the Managed Medicaid population.
The results are based on claims data with dates of service between January 1, 2004 and June 30, 2012 and the measurement year of July 1, 2011 - June 30, 2012.

2014 Disparities in Care Report Summary By County

Using a 95% confidence interval, comparison to the region is denoted as follows:
Grey = rate is similar to region; **Red** = rate is significantly lower than region; **Green** = rate is significantly higher than region
** Results that have a denominator less than 160 have been excluded

*Includes all records for which an ethnicity, language, or race was populated in the Medicaid data set.
**Medicaid data includes all of the race, ethnicity, and language (REL) Medicaid FFS data and a majority of the REL data for the Managed Medicaid population.
The results are based on claims data with dates of service between January 1, 2004 and June 30, 2012 and the measurement year of July 1, 2011 - June 30, 2012.

2014 Disparities in Care Report Summary By County

Using a 95% confidence interval, comparison to the region is denoted as follows:
Grey = rate is similar to region; **Red** = rate is significantly lower than region; **Green** = rate is significantly higher than region
** Results that have a denominator less than 160 have been excluded

*Includes all records for which an ethnicity, language, or race was populated in the Medicaid data set.
**Medicaid data includes all of the race, ethnicity, and language (REL) Medicaid FFS data and a majority of the REL data for the Managed Medicaid population.
The results are based on claims data with dates of service between January 1, 2004 and June 30, 2012 and the measurement year of July 1, 2011 - June 30, 2012.

2014 Disparities in Care Report Summary By County

Using a 95% confidence interval, comparison to the region is denoted as follows:
Grey = rate is similar to region; **Red** = rate is significantly lower than region; **Green** = rate is significantly higher than region
** Results that have a denominator less than 160 have been excluded

*Includes all records for which an ethnicity, language, or race was populated in the Medicaid data set.
 **Medicaid data includes all of the race, ethnicity, and language (REL) Medicaid FFS data and a majority of the REL data for the Managed Medicaid population.
 The results are based on claims data with dates of service between January 1, 2004 and June 30, 2012 and the measurement year of July 1, 2011 - June 30, 2012.

2014 Disparities in Care Report Summary By County

Using a 95% confidence interval, comparison to the region is denoted as follows:
Grey = rate is similar to region; **Red** = rate is significantly lower than region; **Green** = rate is significantly higher than region
** Results that have a denominator less than 160 have been excluded

*Includes all records for which an ethnicity, language, or race was populated in the Medicaid data set.
**Medicaid data includes all of the race, ethnicity, and language (REL) Medicaid FFS data and a majority of the REL data for the Managed Medicaid population.
The results are based on claims data with dates of service between January 1, 2004 and June 30, 2012 and the measurement year of July 1, 2011 - June 30, 2012.

2014 Disparities in Care Report Summary By County

Using a 95% confidence interval, comparison to the region is denoted as follows:
Grey = rate is similar to region; **Red** = rate is significantly lower than region; **Green** = rate is significantly higher than region
 ** Results that have a denominator less than 160 have been excluded

*Includes all records for which an ethnicity, language, or race was populated in the Medicaid data set.
**Medicaid data includes all of the race, ethnicity, and language (REL) Medicaid FFS data and a majority of the REL data for the Managed Medicaid population.
The results are based on claims data with dates of service between January 1, 2004 and June 30, 2012 and the measurement year of July 1, 2011 - June 30, 2012.

2014 Disparities in Care Report Summary By County

Using a 95% confidence interval, comparison to the region is denoted as follows:
Grey = rate is similar to region; **Red** = rate is significantly lower than region; **Green** = rate is significantly higher than region
** Results that have a denominator less than 160 have been excluded

*Includes all records for which an ethnicity, language, or race was populated in the Medicaid data set.
**Medicaid data includes all of the race, ethnicity, and language (REL) Medicaid FFS data and a majority of the REL data for the Managed Medicaid population.
The results are based on claims data with dates of service between January 1, 2004 and June 30, 2012 and the measurement year of July 1, 2011 - June 30, 2012.

2014 Disparities in Care Report Summary By County

Using a 95% confidence interval, comparison to the region is denoted as follows:
Grey = rate is similar to region; **Red** = rate is significantly lower than region; **Green** = rate is significantly higher than region
** Results that have a denominator less than 160 have been excluded
