2015 Community Checkup Chart Pack

December 2015

Key Findings

KEY FINDINGS

Washington has a long way to go to consistently be in the top 10 percent of performance nationally in the delivery of high-quality health care.

For many measures, there has been little improvement over time.

Variation by county, medical group and clinic is a persistent problem in the delivery of health care.

Local successes prove that delivering high-quality health care is an achievable goal here in Washington.

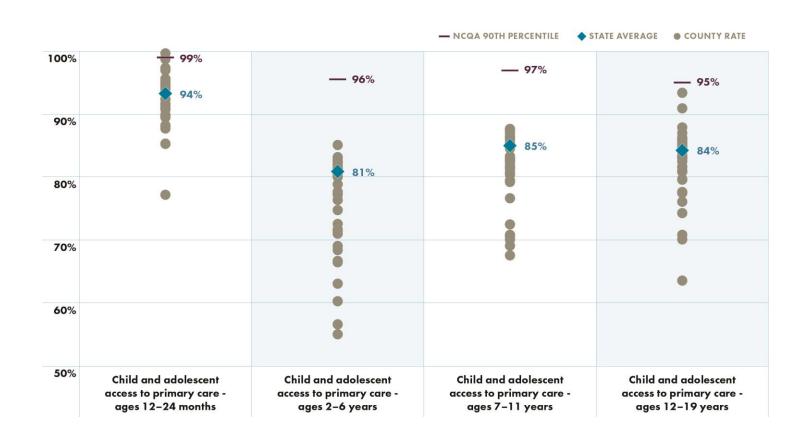

Too many patients in Washington are not receiving the evidence-based care that they need to remain healthy and manage their conditions.

The Common Measure Set and transparency helps us to collectively understand our current performance and target areas for improvement.

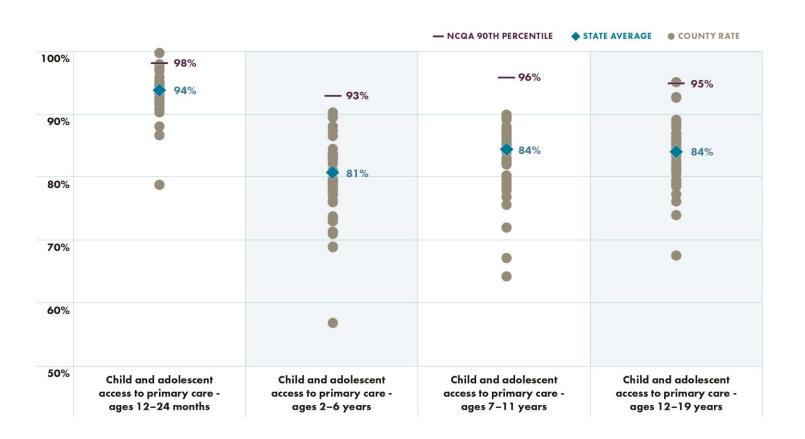

Variation between **Counties** for Child Access to Care Measures for **Commercially Insured**

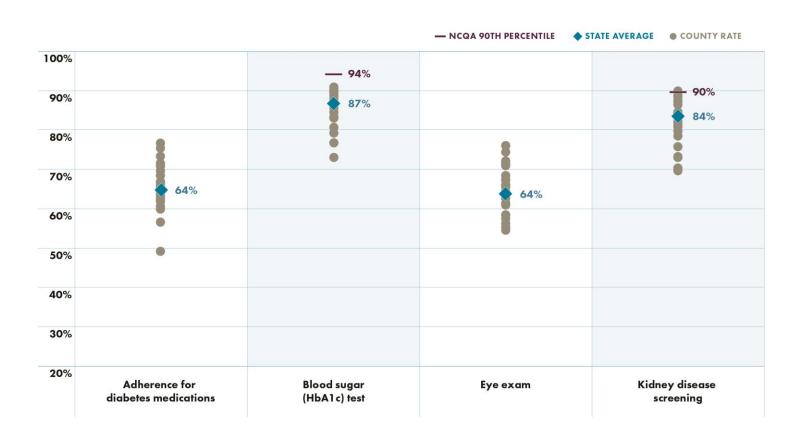

Variation between **Counties** for Child Access to Care Measures for **Medicaid Insured**

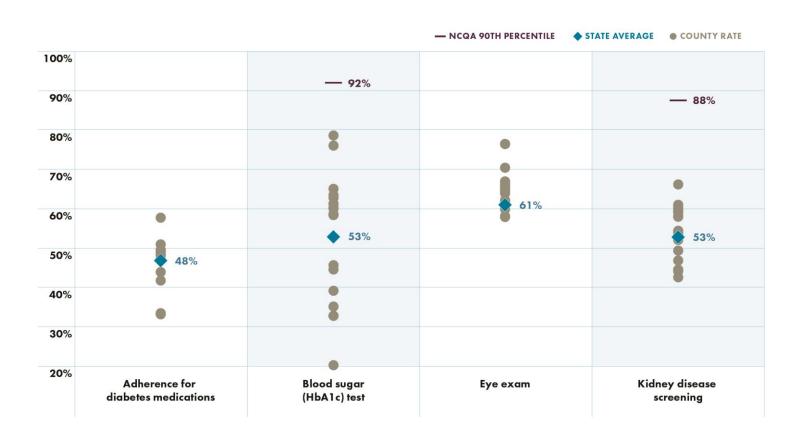

Variation between **Counties** for Diabetes Measures for **Commercially Insured**

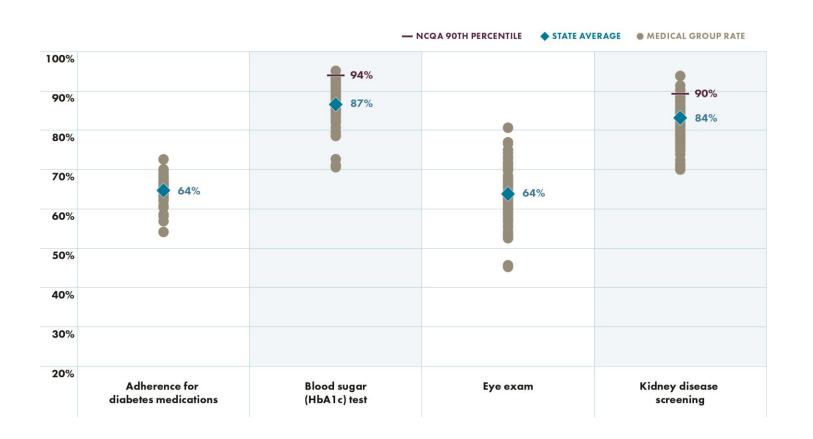

Variation between **Counties** for Diabetes Measures for **Medicaid Insured**

Rules of Use

The Washington Alliance encourages broad and appropriate use of the results to engage purchasers, health plans, doctors, nurses, clinics and patients in conversations about quality, and to set goals and target resources. Optimal use of the Community Checkup results fall into three general areas:

- Drive quality improvement
- Promote consumer health and informed decision-making
- Structure programs to reward value in the delivery of health care

Examples of optimal uses that drive quality improvement, promote consumer engagement and reward value might include: ensuring that health benefits cover and promote needed services or approaches measured in the Community Checkup report; using the results during contract negotiations to recognize or encourage improvement; or, aligning provider reimbursement to reward actions that promote wellness and effectively manage chronic conditions.

Find complete Rules of Use at: http://wacommunitycheckup.org/resources/alliance-reports
